

GST-3V
with low-profile bun feeder

GST-3V
with standard bun feeder

UPGRADE & SAVE

The Gold Standard Toaster, the latest development by Antunes provides operations with improved performance and significant ROI compared to the VCT model. The new design of the GST-3V toasts crowns and heels, and for Texas toast, it performs two-sided toasting in a single pass. With its innovative toasting system that includes dual-belt technology, the GST-3V also consistently produces a hot, caramelized bun without using bun oil. No more bun oil means less mess and fewer costs, saving operations thousands of dollars in annual expenses and labor.

**ESTIMATED
